

Loss Overview Report

RITA operators can now report total losses from the **'Reporting'** tab of RITA. This functionality enables users to extract loss data related to both transport and storage, either over the full duration of the project or within a specified date range.

Location Group

Print Owner Loss Report (en)

The **"From Date"** and **"To Date"** fields allow users to define the time frame for the report, while additional filtering options enable reports to be generated for a specific partner or a specific location group. If no filters are applied, the system will generate a comprehensive report covering all recorded losses for the project.

Reports are currently only available in PDF format.
