

## Online Service Request Form (SRF) User Instructions

The Service Request Form (SRF) is a standardized document that must be completed by any organization requesting transport and / or storage services from the Logistics Cluster. Accurate information on the request is critical for successful tracking , documentation, and accountability of the services to be provided. The user should carefully review the document before submitting the form to the cluster. An SRF only needs to be submitted once - users should not submit a second SRF for the same cargo items.

**Once the SRF is considered accurate and complete, then the Logistics Cluster will issue a SRF Tracking Number to the user and puts the data into a SRF tracking database.**

### Selection of Language

Service requestors can select the preferred language to submit their request from the top right corner. The available languages at the moment are: English, French, Spanish, Portuguese, Arabic and Russian.

### Selection of Service (s)

The drop-down list provides list of services that logistics cluster / sector is providing which includes: Storage, Transport and Storage with pick up. The service types will be limited by the types of services available in that country mission.

Once the service type selection made, please enter the location and dates required for the service.

### Service Details (s)

Depending on the type of service, users will be asked to provide additional relevant information for each service type.

**For storage only:**

Requestors will need to define the desired storage location. Only locations that are active will be available to select. Requestors will also need to define the anticipated start dates and the last date of storage. If the exact duration isn't known, service requestors should use their best estimations to help with planning purposes. A separate storage SRF must be submitted for each location or storage facility.

#### For storage with pick up:

If requestors require pick up services for stored cargo, they will need to include the name of the town, facility location, street address, and if possible, the GPS coordinates. Please be as accurate as possible. If requestors wish to later have cargo delivered to their location, this can be done at the time of requesting release of cargo. The local focal point can also arrange delivery.

\*Confirmation of this request does not mean that a request has been accepted or approved. Requestors will be notified separately once requests have been accepted.

Once a request has been fully submitted, users will be asked if they would like to start a new service request or if they would like to duplicate the current service request. Duplicating a request will speed up the process of making another similar request – requestors can alter some key details but otherwise redo the entire process quickly.

## Confirmation Email

The last step of the process: the email listed as the “requestor” will receive a confirmation email with "[Further Action Required]" in the subject asking the requestor to confirm by following a link. The confirmation email will remain active for 24 hours. Unless the requestor confirms this link, the request will never be fully received by the customer service representative.

## 查找货物尺寸

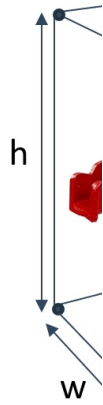

### 测量用于运输和储存的货物

测量用于储存和运输的货物要求规划人员想象这些货物将如何实际占用空间。尽管圆筒中可能装有一定体积的液体，但实际圆筒本身仍需要额外的 "实际 "体积空间。实际使用的体积空间总是可以设想为以下量度：

长度 (l)x 宽度 (w)x 高度 (h)

由于存储设施和运输设施的性质，最好在任何非立方体物体周围想象一个盒子，盒子的边缘位于最长和最高点。这些假想边的长度将用于规划存储和运输的体积。

单位 类型	存储和运输的 "实际 "体积	
盒子	要计算普通箱子的体积，可以用箱子外沿的宽、长和高相乘。	
圆柱体	虽然有确定圆柱体内液体体积的公式，但存储和运输的体积是以其边缘的最大长度来衡量的。	

单位 类型	存储和运输的 "实际 "体积
堆叠或嵌套货物	<p>如果货物将堆叠或 "嵌套 "运输或储存，则应测量所有预期货物的体积，因为它们最终将被运输或储存，相互嵌套或堆叠在一起。不要考虑每个单件的尺寸。</p> 
不规则形状	<p>不规则形状的货物对容积的需求各不相同。除非不规则形状的货物堆叠在一起，否则规划人员可能需要查看用于正确存储或运输不规则形状货物的总体积。</p>
